

EMS and License Compliance Development

Scope of Work

Agon has been assisting Paramount Browns with the development of management plans and standard operating procedures to manage the recycling and material resource recovery facility operated over three sites. This is a long-term commitment by the company to ultimately obtain ISO 14001 certification for their operation. We have also worked closely with the client and the Regulator to review the effectiveness of the stormwater system and monitoring program, to ensure it is fit for purpose and able to demonstrate continual improvement.

→ Impact

Agon has been able to assist our client with improving site practices, build operating procedures and work with the Company towards obtaining certification.

→ Collaboration

Agon worked closely with the Client, the Regulator and the Certifying company to work towards a continual improvement program.

→ Compliance & Expertise

Agon is assisting our client in obtaining ISO Certification.
