

NT Government Assets

Scope of Work

Agon has retained being part of the DIPL/ DLI NT asbestos panel. Having been engaged for the past five years on this panel we provide on-going asbestos and hazardous material audits for NT Government facilities and assets. For this work we have completed audits across the entire Territory and worked in numerous remote communities. To efficiently complete the works we use custom-built software to record and upload information to the Government database.

→ Impact

Agon has been able to optimise the works program to save costs by streamlining audit runs to minimise multiple mobilisations. We have also used tailored software solutions to improve the efficiency of the reporting system.

→ Collaboration

Client and Indigenous Elders for Community access.

→ Compliance & Expertise

Requirements of WHS legislation.
