

**Client**

Terra Verde - JV

**State**

VIC

**Timeline**

4 Year Project

# Suburban Rail Loop - Work Package D

## Scope of Work

Agon is engaged across two contracts to deliver environmental and occupational hygiene services for the Suburban Rail Loop East (Cheltenham to Box Hill) project. This includes groundwater and landfill gas monitoring, soil investigations and waste classifications, and HAZMAT and occupational hygiene services.

## → Impact

Agon has successfully delivered initial rounds of fieldwork and reporting across multiple service streams, supporting both environmental and occupational hygiene components of the project. This has enabled strong coordination with the client and subcontractors, contributing to efficient delivery across the broader scope of works.

## → Collaboration

The project has benefited from a strong, collaborative working relationship with Terra Verde JV. Close coordination across multiple disciplines has supported clear communication, responsive delivery, and effective integration of environmental and occupational hygiene requirements throughout the project lifecycle.

## → Compliance & Expertise

Compliance & Expertise: Delivered in accordance with Victorian environmental and occupational health and safety regulatory requirements.
